

K-Love radio at 96.1 FM out of Clinton, MO serves me 100 miles away in Lee's Summit, MO, by ministering to my family and friends through positive music. If this station is displaced by an LPFM broadcaster, I am told we may not be able to receive the station any longer. This would have a negative impact on our lives, as we are surrounded by harsh DJ's, language and content that is NOT family friendly and we would not have choices would be drastically limited for the type of station K-Love is today. Ensuring that K-Love is allowed to continue in the broadest range of broadcast is in the public's best interest because of its positive content and family friendly programming. We never have to worry about what our kids are going to hear on this station, and by removing its full range of broadcast, a negative result will occur in the lives of our children. Please keep their signal strong and allow them to reach those for hundreds of miles around Clinton, MO.
Thank you,
Dennis Barlow
